13 Wildlife Conservation and Cultural Heritage 46–62

14 Local Flavours 63–68

Dream World Hill Hotel began operations in 2017 and aims to integrate sustainable tourism principles into all its activities. Our key priorities include improving our environmental, social and economic performance, enhancing guest satisfaction and using natural resources efficiently through the establishment and continuous improvement of quality management systems.

Accordingly, we undertake initiatives across various areas of sustainability, including energy efficiency, water management, waste reduction and recycling, environmental protection, support for the local economy and social responsibility.

Our key responsibilities in line with our approach to sustainability:

• Expand recycling and reuse practices,
• Reduce energy and natural resource consumption,
• Minimize our carbon footprint,
• Manage our environmental impacts through continuous improvement,
• Support the development and well-being of our employees,
• Contribute to the economic and social development of the local community,
• Apply sustainable tourism principles across all our operations.

Unless otherwise stated, the information presented in this report covers **sustainability performance data and practices for 2025**.

The 2025 Sustainability Report includes:

• Assessments of our hotel's environmental, social and economic performance,
• Our sustainability targets and commitments,
• The strategies and activities implemented to achieve these targets,
• Potential risks and opportunities,
• Measured performance results and improvement initiatives,
• Sustainability targets for the coming period.

This report has been prepared to share our sustainability efforts with our stakeholders transparently and to demonstrate our commitment to continuous improvement.

Message from the Board of Directors

Dear Guests, Business Partners and Employees,

Since the day Dream World Hill Hotel began operations, we have believed that employee satisfaction is the foundation of guest satisfaction. Our people-centred management philosophy, combined with a service approach that embraces change while preserving our corporate culture and values, supports our ambition to become an exemplary brand in the industry.

We aim to go beyond legal requirements by meeting and continuously improving upon national and international standards in quality, environmental management, energy efficiency, and occupational health and safety. We value transparent, sustainable relationships built on trust with all our stakeholders. Guided by our sense of social responsibility, we continually strive to improve our environmental and social impacts.

Today, global challenges such as climate change, the depletion of natural resources and social inequalities make sustainable development increasingly important. Accordingly, we support the United Nations Sustainable Development Goals and consider our economic success alongside our environmental and social responsibilities.

We believe that a sustainable future is only possible through the collective contribution of all stakeholders. We therefore remain committed to reducing our environmental impacts, using natural resources efficiently, contributing to the local economy and supporting the development of our employees.

At Dream World Hill Hotel, we will continue to implement practices that help our children, grandchildren and future generations live in prosperity and security in a more liveable world. As a business that creates value for society and recognises its environmental and social responsibilities, we aim to strengthen our corporate sustainability and create long-term value for our stakeholders.

I would like to thank all our employees, business partners, suppliers and guests who contribute to our sustainability efforts. I believe that together, we will build a more sustainable future.

Yours sincerely,
ERHAN BERBER

INTEGRATED QUALITY MANAGEMENT SYSTEM POLICY

Our organisation adopts customer and guest satisfaction, food safety, environmental protection, occupational health and safety, and the improvement of energy performance as fundamental principles across all its activities. We implement and continually improve our Integrated Management System in accordance with ISO 9001, ISO 22000, ISO 14001, ISO 45001 and ISO 50001 standards, applicable national and international legislation, customer requirements and other binding obligations.

Within this framework, our organisation:

- **Compliance with Legal and Other Requirements:** Monitors all applicable legal and other requirements relating to quality, food safety, the environment, occupational health and safety, and energy; regularly evaluates compliance and maintains records.
- **Risk and Opportunity Management:** Identifies and controls risks and opportunities relating to quality, food safety, the environment, occupational health and safety, and energy within our processes, and manages them through defined objectives.
- **Food Safety:** Conducts hazard analyses in accordance with HACCP principles; effectively implements prerequisite programmes (PRPs), operational prerequisite programmes (OPRPs) and critical control points (CCPs); and maintains traceability and product withdrawal and recall systems.
- **Quality and Satisfaction:** Analyses customer and guest expectations and evaluates complaints and feedback to ensure consistent service quality.
- **Environmental Management:** Protects natural resources by preventing pollution, reducing waste and supporting recycling.
- **Occupational Health and Safety:** Aims to eliminate hazards and reduce risks; takes preventive measures to avoid occupational accidents and diseases; and supports worker participation.
- **Energy Management:** Commits to improving energy performance, monitoring energy consumption, supporting energy-efficient equipment and practices, and achieving continual improvement by establishing energy objectives and performance indicators.
- **Competence and Awareness:** Conducts training and awareness activities to strengthen employees' understanding of quality, food safety, the environment, occupational health and safety, and energy.
- **Monitoring and Continual Improvement:** Measures performance and monitors the system through internal audits and management reviews; implements corrective actions to address nonconformities; and continually improves the Integrated Management System.

We aim to become one of the most preferred hotels in our industry by combining Turkish hospitality with continually enhanced quality standards and ongoing staff training.

In line with the expectations of our guests and employees, we are committed to:

• Safely preparing and serving selected dishes from traditional Turkish and international cuisines through our trained staff, in accordance with food safety requirements.

• Ensuring good manufacturing practices, good hygiene practices and appropriate environmental conditions.

• Establishing and maintaining effective communication on food safety matters with suppliers, customers and relevant parties throughout the food chain.

• Complying with all applicable national and international legislation, regulations, mandatory standards and guest requirements relating to energy use, consumption and efficiency.

• Protecting our organisation's information assets against all internal and external threats, whether intentional or accidental; ensuring access to information as required by business processes; and meeting applicable legal requirements.

• Providing all employees with the information and training necessary to recognise that protecting their own health and safety, as well as that of their colleagues and guests, is a fundamental responsibility.

• Recovering recyclable waste, reducing the consumption of finite natural resources, preventing pollution caused by environmentally harmful waste, and taking the necessary measures to protect living organisms and the environment across all our activities.

• Developing our Business Continuity Management System, continually monitoring and updating essential operational processes, and ensuring prompt action in the event of an incident, crisis or disaster.

• Embracing the philosophy of **CONTINUAL IMPROVEMENT** across all our processes.

DREAMWORLD Hotels

OUR ENVIRONMENTAL AND SOCIAL POLICY

Protecting and supporting the environment and the communities in which we operate, while ensuring a liveable future for ourselves and future generations, forms the foundation of our Environmental and Social Policy.

To this end, we make every effort to establish clear environmental objectives and targets and integrate a review process as a core element of our group's environmental initiatives.

We establish, manage and maintain our hotel, catering, facilities and other related services to operate more efficiently and profitably while using fewer resources and minimising energy consumption.

By controlling our operations, we reduce water consumption, chemical use and waste generation. We prioritise environmental protection when selecting chemicals. Through the continual improvement of our environmental practices, we minimise the environmental impacts of our activities.

We organise activities to raise environmental awareness among our employees, guests, suppliers and the wider community. We also organise and participate in projects supporting people in need. Our initiatives support the professional development of local residents and help people in need access available opportunities and resources.

We support sustainable tourism in our region by introducing guests to local culture and encouraging them to explore local historical and cultural attractions and activities.We protect the environment, prevent pollution and minimise the negative environmental impacts of our operations. To achieve this, we:

- Comply with applicable environmental regulations and strive to reduce our environmental impact.
- Carefully separate waste according to its source, type and hazard classification.
- Recognise that using hazardous substances and chemicals only when necessary and in the quantities required reduces both negative environmental impacts and waste generation.
- Contribute to environmental protection by choosing materials labelled as "recycled" or "environmentally friendly" and seeking opportunities for reuse.
- Use disposable materials, such as paper, napkins, toilet paper and packaging, only in the quantities needed to minimise waste.
- Store waste correctly in designated areas according to its characteristics, transfer it to licensed or authorised companies within the legally permitted storage periods, and maintain the relevant records.
- Strive to use water, energy and all natural resources efficiently, and share this commitment with our employees, guests and suppliers.
- Measure our environmental management performance, monitor the results against our targets and work towards continual improvement.

FOOD SAFETY POLICY

At Dream World Hill, we are committed to ensuring the highest food safety standards across all food and beverage services offered to our guests. To this end, we:

• Fully implement the requirements of the ISO 22000:2018 Food Safety Management System.

• Identify, analyse and control all hazards that may affect our guests' health.

• Work with reliable, approved suppliers and use raw materials that meet food safety requirements.

• Ensure that all employees follow hygiene rules and receive regular training.

• Continually improve our processes and maintain the highest levels of guest satisfaction.

• Fully comply with applicable legislation, customer expectations and international standards.

• In line with the expectations of our guests and employees, safely prepare and serve selected dishes from traditional Turkish and international cuisines through our trained staff, in accordance with food safety requirements.

OCCUPATIONAL HEALTH AND SAFETY POLICY

At Dream World Hill Hotel, we recognise the protection of the health, safety and well-being of all our employees, subcontractors, suppliers and guests as a fundamental responsibility.

Employees, contractors and visitors on our premises are required to work safely, take all reasonable precautions to protect their own health and safety, and safeguard the health and safety of others who may be affected by their actions.

To this end, we:

- Take all reasonable and practicable steps to improve occupational health and safety conditions across all relevant activities, drawing on qualified internal personnel and/or external specialists when necessary.
- Build a strong occupational health and safety culture by encouraging all employees, contractors and visitors to participate actively in measures aimed at improving health and safety.
- Fully comply with all applicable occupational health and safety legislation, regulations and relevant standards.
- Identify and assess the risks and hazards that may arise from our activities and implement appropriate risk management systems.
- Provide safe, controlled working environments, suitable equipment and appropriate working conditions.
- Provide all employees with occupational health and safety training appropriate to their roles and responsibilities.
- Establish annual occupational health and safety objectives and programmes and allocate the resources necessary to improve workplace health and safety performance.
- Conduct regular health surveillance to protect and improve our employees' health.
- Thoroughly investigate all occupational accidents, near misses and nonconformities, analyse their root causes and take measures to prevent recurrence.
- Support injured employees through appropriate rehabilitation to enable a safe return to work as soon as practicable.

- The standards and practices established under this policy are regularly reviewed and monitored to ensure continual improvement, maintain effectiveness and enhance occupational health and safety performance.

OUR CHILD PROTECTION POLICY

We respect children's rights and take the necessary measures to protect them from all forms of exploitation.

We support preventive programmes aimed at keeping children from becoming vulnerable and in need of protection and care.

We support institutions and organisations that help reintegrate children who have come into conflict with the law or have been victims of crime into society.

We cooperate with all stakeholders providing services to children.

We carry out activities to raise public awareness and sensitivity regarding the prevention of violence against children.

We provide child protection training for our staff and support child protection organisations, initiatives and events in our community.

We train our staff to remove children from an abusive environment and inform the relevant managers in the event of suspected abuse.

OUR SUSTAINABILITY POLICY

To protect the environment and meet the requirements of sustainable tourism, we identify our environmental impacts and control adverse effects, potential hazards and waste.

We strive to minimise natural resource use, energy consumption, and air, water and soil pollution. We comply fully with all applicable legislation and regulations in our country relating to the environment, occupational health and safety, and human rights.

In conducting our activities, we take and implement the necessary measures to protect our guests and employees from injuries and illnesses and to provide good working conditions.

We seek to ensure that environmental awareness and our commitment to social responsibility are embraced not only by our employees but also by our guests, suppliers, subcontractors and relevant authorities. By cooperating with local authorities, suppliers and non-governmental organisations, we contribute to the development of environmental protection and social responsibility projects.

We take all necessary measures to increase local employment and protect and enhance wildlife in the regions where we operate. We share our environmental protection activities with the public.

We prioritise environmental responsibility when selecting suppliers and favour recycled or recyclable products. We give preference to sourcing products from suppliers with certifications such as Fair Trade, organic, FSC and MSC.

WOMEN'S RIGHTS AND GENDER EQUALITY POLICY

We value gender equality within our organisation.

• Ensure the health, safety and well-being of all employees, regardless of gender.

• Support women's participation in the workforce across all departments and provide equal opportunities.

• Apply a policy of equal pay for equal work, without gender discrimination.

• Allocate duties in accordance with the principle of equality.

• Create an environment that ensures equal access to career opportunities.

• Establish training policies and support women's participation and increased awareness.

• Develop working environments and practices that support a balance between work and family life.

• Support women's participation in company management and provide equal opportunities.

• Do not tolerate any form of abuse, harassment, discrimination, oppression, coercion, defamation or similar mistreatment of women. We recognise the value women bring to the world and our organisation and support their presence and participation.

OUR COMMUNITY INTEGRATION POLICY

At Dream World Hill Hotel, we are committed to supporting the local community in the region where we operate and working collaboratively with local residents. We aim to conduct our activities in a way that protects and enhances our destination's cultural values, historical heritage and local economy.

We believe in the importance of maintaining ongoing communication and cooperation with the local community to contribute to residents' well-being, quality of life and the protection of their environment.

Our Core Principles:

- Support initiatives that contribute to local community development.
- Support the local economy and employment.
- Respect local culture, traditions and ways of life, and contribute to their preservation.
- Support and protect local residents' access to essential resources and services.

Actions We Take to Achieve Our Objectives:

- We encourage our guests to learn about the region's history, culture, traditions and local life, and to explore local products and services.
- We contribute to the protection and maintenance of culturally and spiritually significant sites through annual donations and encourage our guests to visit these places.
- In accordance with our purchasing policy, we support the development of the local economy by choosing local and regional products and services wherever possible.
- Under our recruitment policy, we give priority to local candidates and provide employment opportunities for local residents through on-the-job training programmes.
- We maintain regular communication with local associations, chambers of commerce and relevant organisations to assess the needs and expectations of the local community. We value fair and equal treatment of all stakeholders.
- We organise regular beach clean-up activities involving our guests and employees to help protect coastal areas, beaches and wildlife.
- We also contribute to social responsibility initiatives by providing annual financial support to various local charities.

SUSTAINABLE PURCHASING POLICY

In line with our approach to sustainable procurement, we place importance on our suppliers and business partners:

• Having quality, environmental, and occupational health and safety management systems, as well as internationally recognised environmental and sustainability labels or certifications.

• Avoiding harmful environmental impacts in production and supply activities and complying with environmental legislation.

• Using resources responsibly without harming wildlife or ecosystems and observing hunting and fishing restrictions.

• Working to minimise and properly manage waste, and offering reduced-packaging or bulk-packaging alternatives.

• Offering environmentally friendly, resource-efficient, local and ethically responsible alternatives, including products that use recyclable or recycled materials, are organic, vegan or not tested on animals, or contain no harmful chemical ingredients.

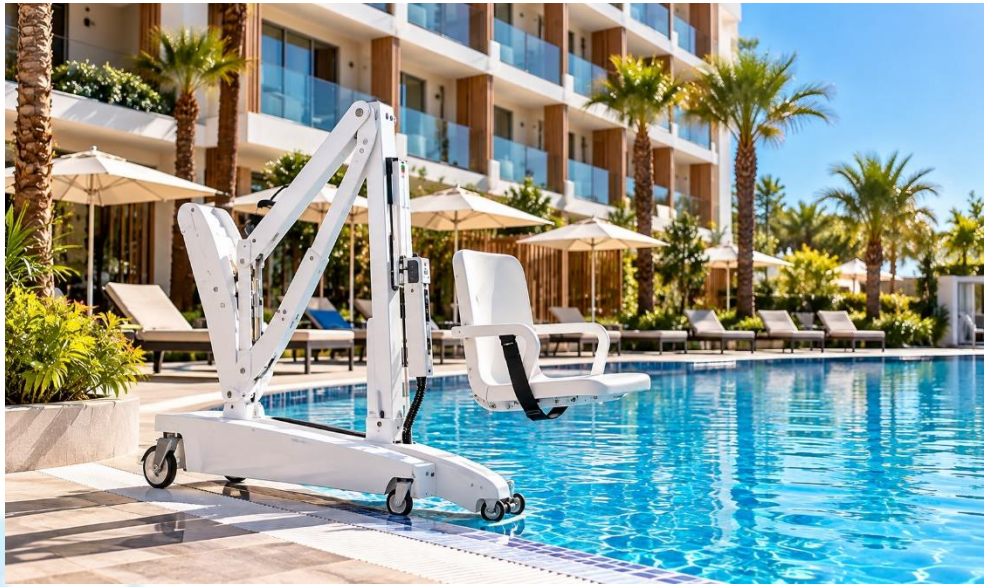
• Being domestic and local producers or service providers.

• Providing products and services that reflect and promote the cuisine, traditions and culture of our country and region.

We communicate these priorities to our suppliers and work together to create efficient purchasing opportunities. We aim to reduce the environmental impacts arising from our procurement processes.

OUR HEALTH AND SAFETY POLICY FOR DISADVANTAGED GROUPS

Everyone has the right to a holiday, and holidays are a necessity. Our foremost priority is therefore to ensure, from the planning stage onwards, that our accommodation facilities provide suitable physical infrastructure in guest rooms and all indoor and outdoor communal areas for guests with and without disabilities.



To maintain the satisfaction of guests with additional needs, we also prioritise the ongoing recruitment and training of suitable staff and keep pace with technological developments.

With our commitment to equal service and our trained staff, we work diligently to provide guests with additional needs with the comfort of home, both in their rooms and throughout all our service areas.

Our management approach is guided by the principle that barriers lie in the physical environment rather than in the individual. We therefore prioritise making our facilities accessible to ensure our guests' comfort and convenience.

We believe that everyone, regardless of disability or disadvantage, should have the right to work. Accordingly, we also employ people from disadvantaged groups at our hotel.

WASTE MANAGEMENT

- RECYCLABLE WASTE
- HAZARDOUS WASTE
- WASTE VEGETABLE OIL

At Dream World Hill Hotel, the primary objectives of our waste management system are to reduce waste generation, manage waste effectively, ensure its disposal with minimal environmental impact, and recover materials suitable for reuse or recycling.

RECYCLABLE WASTE

• *We contribute to recycling by carefully separating our packaging waste and organic waste.*

• *We undertake various initiatives to reduce waste generation and encourage our guests and employees to participate in our recycling programme. We provide waste separation containers throughout the hotel, including office areas, for glass, paper, oil, plastic and food waste.*

• *We also provide waste separation bins in guest areas. We work with relevant companies to recycle the separated waste and monitor the proces*

Evsel Atık	CAM	PLASTİK	METAL	KAĞIT / KARTON	ORGANİK	TOPLAM

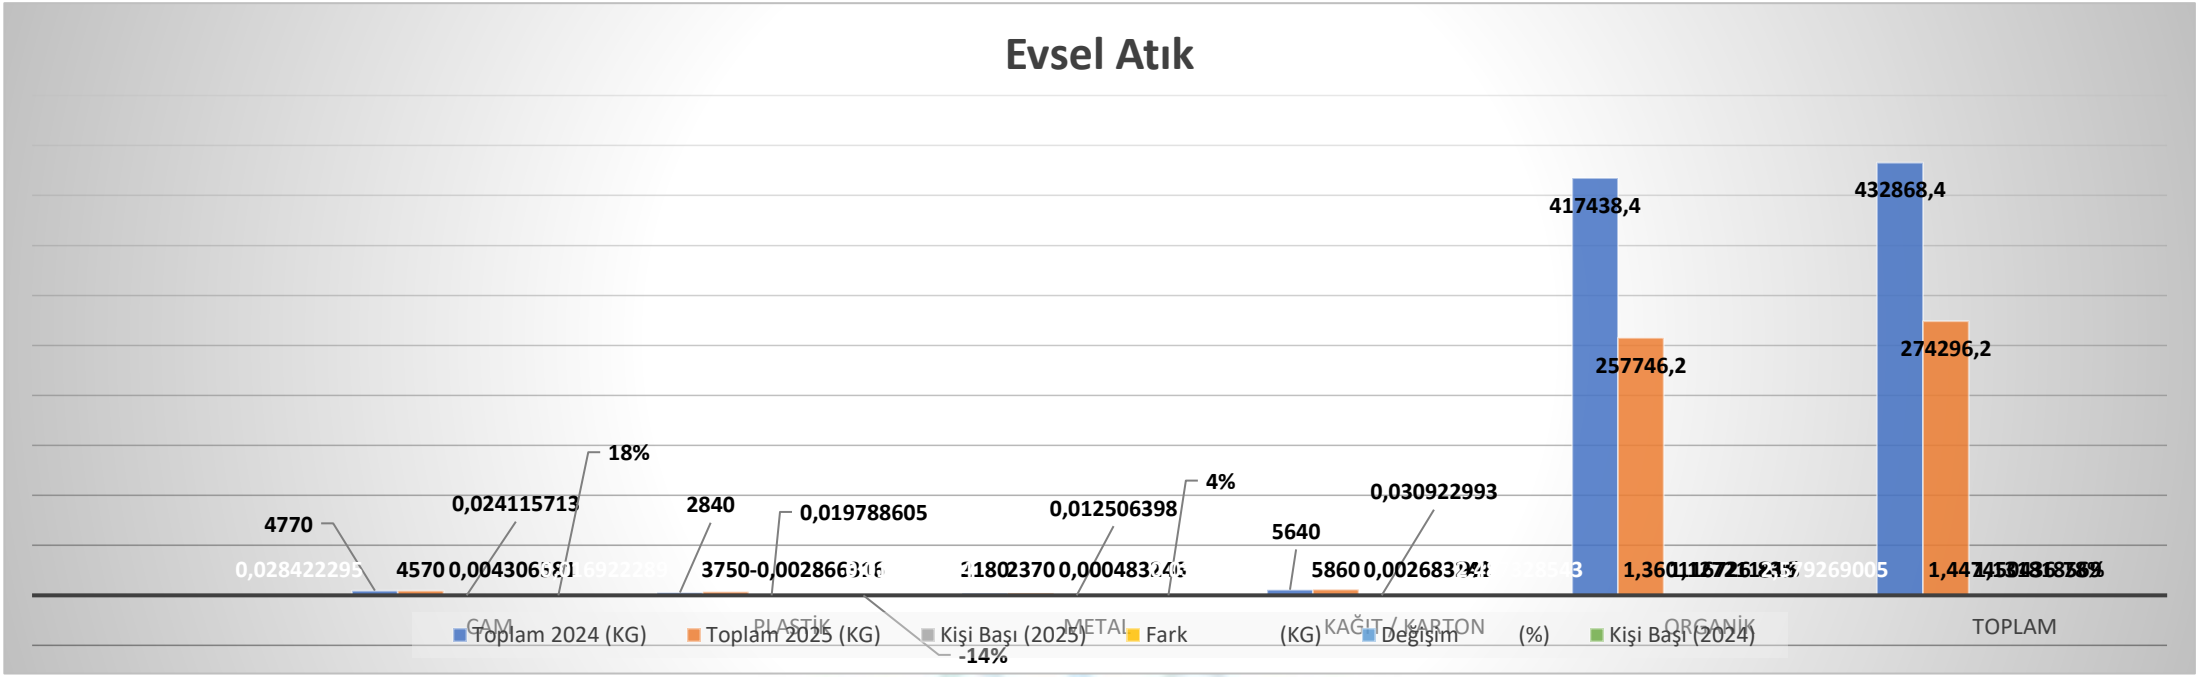
Değişim (%)	18%	-14%	4%	9%	83%	78%



• In 2025, total domestic waste per person decreased by approximately 44% compared with 2024, falling from 2.58 kg to 1.45 kg. Our efforts to reduce waste generation are ongoing.

• Organic waste per person decreased by approximately 45%. We are improving practices in our kitchen and buffet areas to prevent food waste and reduce waste generation.

• Glass waste per person decreased by approximately 15% and paper/cardboard waste by 8%, while plastic waste increased by 17% and metal waste by 4%. To reduce paper consumption, guests are directed to our digital information system via QR codes.

• We provide regular staff training to promote waste separation at source, raise recycling awareness and reduce waste generation per person.

HAZARDOUS WASTE

Hazardous waste generated across our facilities is collected and labelled in designated hazardous waste storage rooms under appropriate conditions. It is then transferred to licensed companies for disposal or recovery in accordance with legal requirements, ensuring that it is managed without harming the environment.

	Toplam 2024	Toplam 2025	Fark	Değişim (%)
Tehlikeli Atıklar (kg)	364	573	209	57%

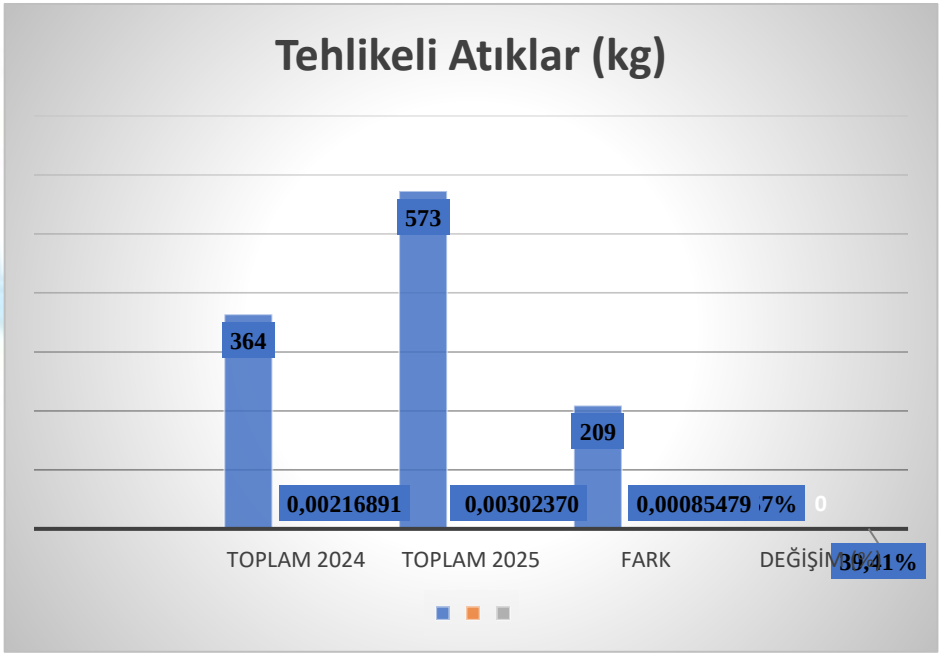
- **In 2025, total hazardous waste increased by approximately 57% compared with 2024, rising from 364 kg to 573 kg. Our efforts to reduce hazardous waste generation are ongoing.**
- **Hazardous waste per person increased by approximately 39%. Accordingly, we place importance on reviewing the processes that generate hazardous waste and improving waste reduction practices.**
- **Hazardous waste is collected separately at source, temporarily stored under appropriate conditions and transferred to licensed companies in a manner that protects the environment and human health.**
- **Staff information and training activities are ongoing to ensure proper separation and safe storage of hazardous waste and improve the effectiveness of waste management practices.**



WASTE VEGETABLE OIL

We increase the amount of waste vegetable oil sent for recycling each year. The waste oil generated is regularly collected by the licensed companies with which we have agreements.

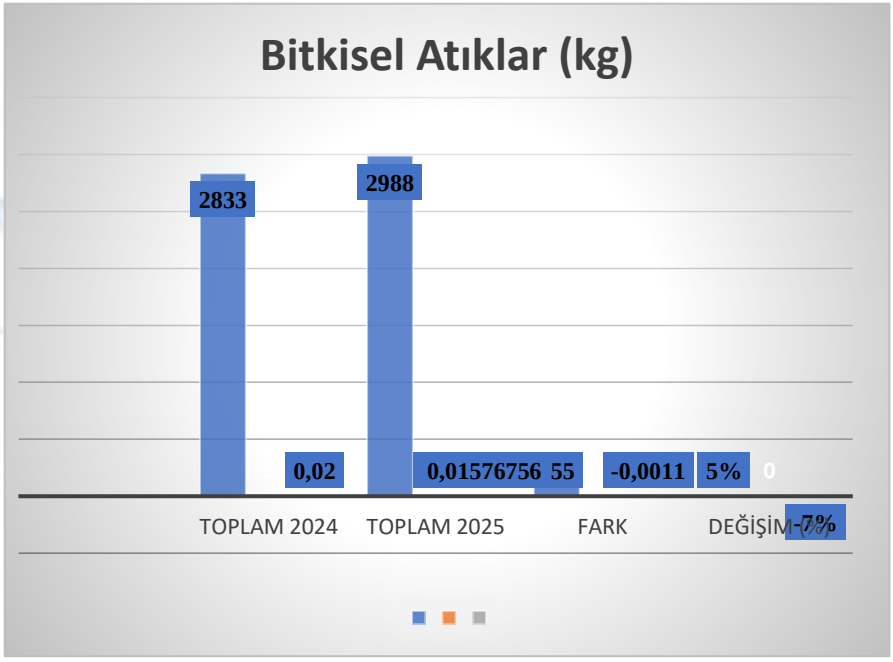
Bitkisel Atıklar (kg)	Toplam 2024	Toplam 2025	Fark	Değişim (%)
	2833	2988	155	5%
	Kişi Başı 2024	Kişi Başı 2025	Fark	Değişim
	0,02	0,01576756	- 0,0011	-7%

• In 2025, total waste vegetable oil increased by approximately 5% compared with 2024, rising from 2,833 kg to 2,988 kg. We prioritise its separate collection and recovery.

• Despite the increase in the total amount, waste vegetable oil per person, as shown in the table, decreased by approximately 7%. Our efforts to use resources efficiently and reduce waste generation are ongoing.

• Waste vegetable oil is collected separately from other waste in suitable containers and transferred to licensed companies for recovery.

• We place importance on raising employee awareness to prevent waste vegetable oil from being poured into sinks or sewer systems, ensure proper collection and reduce its environmental impacts.



CHEMICAL CONSUMPTION

We monitor our chemical consumption and provide staff training to prevent wasteful or incorrect use. Employees receive training on the safe use of chemicals and the measures to take in the event of hazardous chemical spills or splashes. To reduce chemical use, pesticides are applied to plants on the hotel grounds only when necessary, rather than routinely. Chemicals in our hotel's laundry are dispensed through an automatic dosing system.

ENERGY MANAGEMENT

- ELECTRICITY CONSUMPTION
- NATURAL GAS CONSUMPTION
- WATER CONSUMPTION
- COAL CONSUMPTION
- LPG CONSUMPTION
- DIESEL CONSUMPTION
- CARBON EMISSIONS

DREAMWORLD Hotels

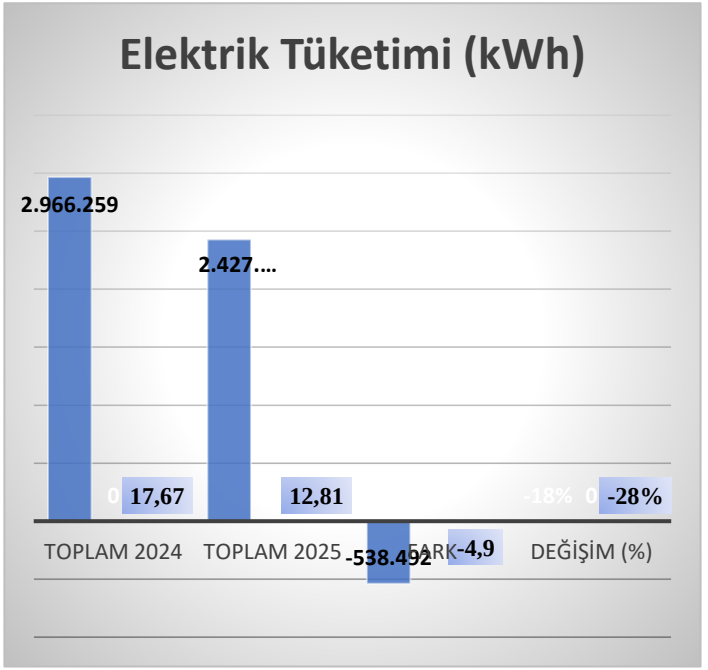
www.dreamworldhotels.com.tr

ELECTRICITY CONSUMPTION

We prioritise investment in renewable energy to reduce the environmental impacts of our facilities' energy consumption and support sustainable energy use. As part of this commitment, a solar power plant with an installed capacity of approximately 7 MW is actively operating in the Burdur region. This investment supplies electricity to our facilities from renewable sources, contributing to lower carbon emissions and more efficient use of natural resources. This initiative forms an important part of our efforts to achieve our environmental sustainability goals.

The tables below present our hotel's electricity consumption for 2024 and 2025.

Elektrik Tüketimi (kWh)	Toplam 2024	Toplam 2025	Fark	Değişim (%)
	2.966.259	**2.427.767**	-538.492	-18%
	Kişi Başı 2024	**Kişi Başı 2025**	**Fark**	**Değişim**
	17,67	**12,81**	-4,9	-28%



• In 2025, total electricity consumption decreased by approximately 18% compared with 2024, falling from 2,966,259 kWh to 2,427,767 kWh—a reduction of 538,492 kWh.

• Electricity consumption per person decreased by approximately 28%, from 17.67 kWh to 12.81 kWh. The reductions in both total and per-person consumption represent a positive development in energy use.

• To reduce electricity consumption, we prioritise the efficient use of lighting, heating and cooling systems, and other electrical equipment, as well as preventing unnecessary energy use and carrying out regular maintenance.

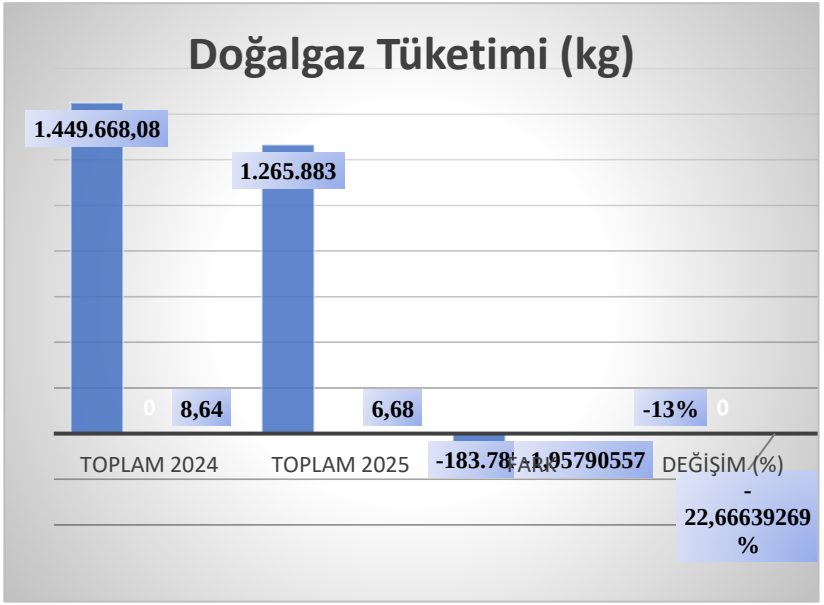
• To sustain energy efficiency, we regularly monitor consumption data and encourage our employees and guests to participate in energy-saving practices.

NATURAL GAS CONSUMPTION

We prioritise controlling natural gas consumption to reduce its environmental impacts and use energy resources efficiently. Our efforts include regular maintenance and inspections of systems that use natural gas, efficient equipment operation and the prevention of unnecessary consumption. We regularly monitor natural gas consumption to achieve energy savings, reduce carbon emissions and contribute to our sustainability goals.

The tables below present our hotel's total and per-person natural gas consumption data for 2024 and 2025.

Doğalgaz Tüketimi (kg)	Toplam 2024	Toplam 2025	Fark	Değişim (%)
	1.449.668,08	1.265.883	-183.785	-13%
	Kişi Başı 2024	Kişi Başı 2025	Fark	Değişim (%)
	8,64	6,68	-1,95790557	-22,66639269%



• In 2025, total natural gas consumption decreased by approximately 13% compared with 2024, falling from 1,449,668.08 kg to 1,265,883 kg—a reduction of 183,785.08 kg.

• Natural gas consumption per person decreased by approximately 23%, from 8.64 kg to 6.68 kg. The reductions in both total and per-person consumption represent a positive development in energy use.

• To reduce natural gas consumption, we prioritise regular maintenance and inspections of systems that use natural gas, efficient equipment operation and the prevention of unnecessary energy use.

• To sustain energy savings, we regularly monitor consumption data and continue raising employee awareness of the efficient use of resources.

WATER CONSUMPTION

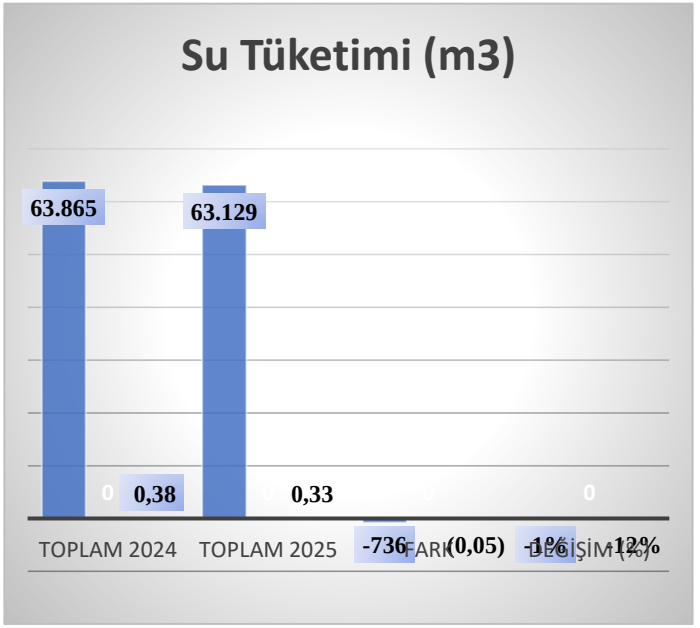
To reduce overall water consumption without compromising health, hygiene or guest satisfaction, we use water-saving fixtures, place an informative "Environmental Brochure" on water conservation in guest rooms and provide staff training.

The following water-saving measures are implemented and maintained across our hotels. We monitor water risk through the World Resources Institute (wri.org).

• Flow restrictors are fitted to taps and showers.
• Water-efficient and/or dual-flush toilet systems are used.
• Sensor-operated taps and urinals are installed in communal toilets.

The tables below present our hotel's water consumption for 2024 and 2025.

Su Tüketimi (m^3)	Toplam 2024	Toplam 2025	Fark	Değişim (%)
	63.865	63.129	-736	-1%
	Kişi Başı 2024	Kişi Başı 2025	Fark	Değişim
	0,38	0,33	-0,05	-12%



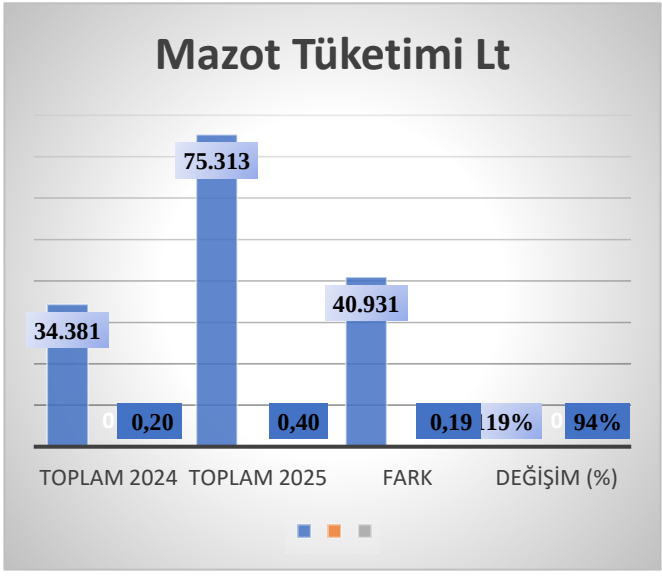
- **In 2025, total water consumption decreased by approximately 1% compared with 2024, falling from 63,865 m^3 to 63,129 m^3—a reduction of 736 m^3.**
- **Water consumption per person decreased from 0.38 m^3 to 0.33 m^3. The reductions in both total and per-person consumption represent a positive development in the use of water resources.**
- **To reduce water consumption, we prioritise regular inspections of plumbing and equipment, prompt repair of leaks and the use of water only as needed.**
- **To sustain water savings, we regularly monitor consumption data and encourage our employees and guests to participate in water conservation practices.**

DIESEL CONSUMPTION

We prioritise monitoring diesel consumption to reduce its environmental impacts and ensure efficient fuel use. Our efforts include regular maintenance and inspections of diesel-powered vehicles and equipment, preventing unnecessary fuel consumption and planning operating times according to need. These practices aim to save fuel, reduce carbon emissions and contribute to the conservation of natural resources.

The tables below present our hotel's total and per-person diesel consumption data for 2024 and 2025.

	Toplam 2024	Toplam 2025	Fark	Değişim (%)
Mazot Tüketimi (Lt)	34.381	75.313	40.931	119%
	Kişi Başı 2024	Kişi Başı 2025	Fark	Değişim
	0,20	0,40	0,19	94%



• In 2025, total diesel consumption increased by approximately 119% compared with 2024, rising from 34,381 litres to 75,313 litres. This increase highlights the importance of assessing fuel-consuming activities and equipment in terms of consumption.

• According to the calculations in the table, diesel consumption per person increased by approximately 94%. To reduce per-person consumption, we prioritise closer monitoring of fuel use and improvements in efficiency practices.

• We aim to reduce fuel consumption through regular maintenance and inspections of diesel-powered vehicles and equipment, preventing unnecessary operation and planning operating times according to need.

• To reduce carbon emissions from diesel consumption, we prioritise regular monitoring of consumption data and raising employee awareness of fuel-saving practices.

Guest meeting carbon footprint		kgCO2e
Guest's total carbon footprint	**19.035.400**	**kgCO2e**

Renewable Energy and Electricity	
TOTAL renewable energy used by the hotel (kWh)	**2.427.767**
TOTAL renewable energy used by the hotel (% of total energy consumption)	**54,7%**

Carbon Footprint per Person Calculation: (Total Carbon Footprint / Total Guest Nights) × 1,000 (Conversion from tonnes to kilograms)

(1,920.06 / 189,503) × 1,000 = 10.13 kg CO_2e

• Our total carbon footprint for 2026 was 1,920.06 tonnes CO_2e, with carbon emissions calculated at 10.13 kg CO_2e per guest night. Our renewable energy share was 54.7%, and our efforts to reduce carbon emissions and improve energy efficiency are ongoing.

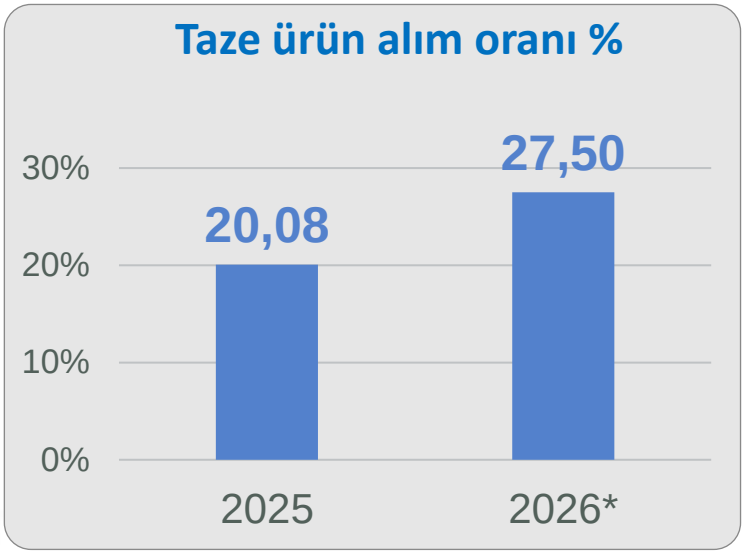
FRESH PRODUCT PURCHASING RATIO

• The fresh product purchasing ratio increased from 20.08% in 2025 to 27.50% in 2026. This represents an increase of 7.42 percentage points and a relative rise of approximately 36.95%.

• The growing share of fresh products in total food purchases demonstrates the importance our hotel places on using fresh ingredients. This is a positive development in expanding product variety and menu options that support a balanced diet.

• To support sustainable food procurement, we prioritise local and seasonal products when purchasing fresh ingredients, plan purchases according to need and work to reduce food waste.

• The 2026 data cover the period up to the end of September. As the season is not yet complete, the fresh product purchasing ratio will continue to be monitored and reassessed using complete year-end data.



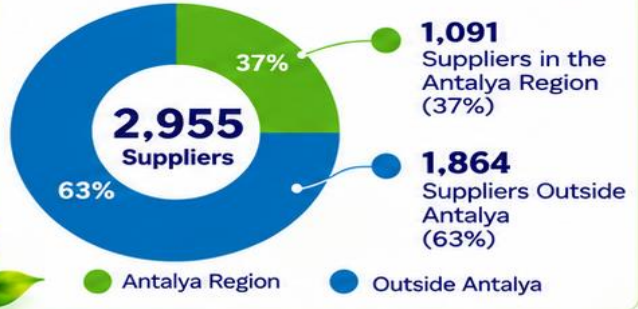
SUPPLIER DISTRIBUTION REPORT (2026) HILL

DREAM WORLD HILL

This report presents the regional distribution of suppliers involved in our hotel's food procurement and our sustainable sourcing practices. Local sourcing helps reduce our carbon footprint, support the regional economy and build a more sustainable future.

TOTAL SUPPLIERS	SUPPLIERS IN THE ANTALYA REGION	SUPPLIERS OUTSIDE ANTALYA
2.955	1.091	1.864

SUPPLIER DISTRIBUTION (2026)



1,091 Suppliers in the Antalya Region (37%)

1,864 Suppliers Outside Antalya (63%)

SHARE OF SUPPLIERS IN THE ANTALYA REGION (2026)

37% of all our suppliers are located in the Antalya region.

SUPPLIERS OFFERING FAIR TRADE, ECO LABEL OR B-CORP CERTIFIED PRODUCTS (2026)

FAIRTRADE INTERNATIONAL · EU Ecolabel · Certified B Corporation

3 Suppliers

SHARE OF SUPPLIERS OFFERING CERTIFIED PRODUCTS (2026)

0.10% of all our suppliers offer Fair Trade, Eco Label or B-Corp certified products.

ASSESSMENT

In 2026, **3 of our 2,955** suppliers offer Fair Trade, Eco Label or B-Corp certified products, representing **0.10%** of all suppliers.

In line with our commitment to sustainable and responsible sourcing, we continue working in **2026** to increase the number of suppliers offering Fair Trade, Eco Label or B-Corp certified products.
We prioritise suppliers that meet environmental and social responsibility criteria and support the development of a sustainable supply chain.

Responsible Sourcing, A Sustainable Future...

STAFF TRAINING
AND SOCIAL ACTIVITIES

STAFF TRAINING

Informed Staff, A Sustainable Future

DREAMWORLD Hotels

In line with our annual training plans, our hotels provide training in food safety, environmental awareness, chemical safety, occupational health and safety, first aid, fire safety, quality and social topics.

Our training is organised as internal and external sessions. Environmental training covers environmental cleanliness, wildlife conservation, correct waste separation, waste reduction, safe chemical use and zero waste. Our environmental consultancy provides regular staff awareness training. We also receive training from our chemical suppliers.

Our environmental consultancy provides regular staff awareness training.

We also receive training from our chemical suppliers.

ENVIRONMENTAL TRAINING

FOOD SAFETY TRAINING

FIRE SAFETY TRAINING

TRAINING WE PROVIDE

- Food Safety
- Environmental Awareness
- Chemical Safety
- Occupational Health and Safety
- First Aid
- Fire Safety
- Quality Management
- Social Awareness Training

Our trained staff provide safer, healthier and higher-quality service to our guests.

WE ARE READY FOR EMERGENCIES!

In addition to environmental training, we have established emergency teams for incidents that may occur in our hotels. We recognise the importance of being informed and prepared.

- We receive fire safety and first aid training.
- We conduct regular drills to prepare for emergencies.

FIRE SAFETY TRAINING | FIRST AID TRAINING | EMERGENCY DRILLS

EMERGENCY TEAM TRAINING

FIRST AID TRAINING

CHEMICAL SAFETY TRAINING

WE PROTECT NATURE

We transfer waste vegetable oil and residues to licensed companies for disposal.

Our internal and external training raises awareness of waste vegetable oil recycling and its environmental impacts.

INFORMED TRAINING, SUSTAINABLE TOMORROWS | WE PROTECT NATURE | WE PRIORITISE THE SAFETY OF PEOPLE AND PROPERTY | WE REDUCE AND RECYCLE WASTE | WE VALUE CONTINUAL DEVELOPMENT AND TRAINING | WE PROVIDE SAFE, HEALTHY AND HIGH-QUALITY SERVICE

Trained staff, a strong hotel; a clean environment, a sustainable future!

SOCIAL ACTIVITIES

In addition to the training and activities organised within our hotels, we participate in environmental initiatives with local organisations to maintain the standards recognised by our environmental awards and raise awareness among local residents. We give chocolates to our employees during religious holidays and provide grocery and food assistance to employees in need. We also take part in social projects with local organisations and support environmental awareness activities in our region.

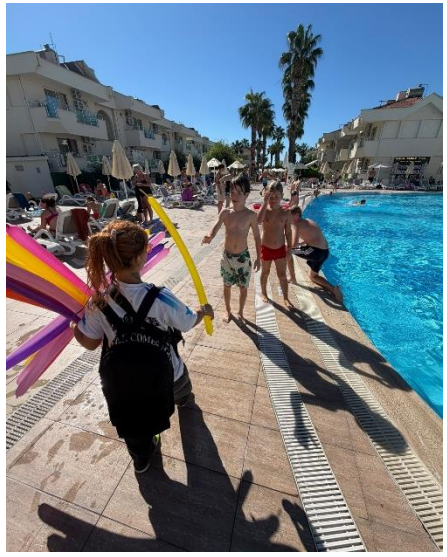
We aim to provide a working environment that meets international standards and respects human rights, where employees can develop their skills, express their ideas freely and work without discrimination.

Staff Canteen: Meals served in our staff canteen are free of charge for employees. Breakfast, lunch, dinner and late-night meals are provided, along with hot and cold beverages.

Doctor's Office: Our hotel has a doctor's office staffed by a doctor and a nurse. Employees can access healthcare services during working hours.

Under the Vocational Training Cooperation Protocol signed with the Antalya Provincial Directorate of National Education, nearly 300 of our employees have received master craftsperson training.

Our training programmes will continue in 2026.



DREAMWORLD Hotels

SUPPORTING WOMEN

Building a Stronger Tomorrow

We hosted Toros Kadınları at our hotel, giving them the opportunity to promote and sell their handmade products.

TOROS KADINLARI

TOROS KADINLARI WELCOMED AT OUR HOTEL

Toros Kadınları displayed their handmade products at a stand in our hotel and introduced them to our guests.

- We support women's contribution to production.
- We contribute to local development.
- We strengthen community solidarity.
- Stronger together, for a brighter tomorrow.

SUPPORT FOR WOMEN ENTREPRENEURS

We promote local women entrepreneurs' products, provide sales opportunities and contribute to their economic development.

ACTIVE PARTICIPATION IN SOCIAL LIFE

We encourage women to take a more active role in social life and work towards a fair and inclusive society.

CONTRIBUTION TO THE LOCAL COMMUNITY

By supporting local production, we contribute to the regional economy and sustainable development.

A SUSTAINABLE FUTURE

We continue working towards a sustainable future with strong women and a stronger tomorrow.

Empowering a woman empowers a family and a community.

STRONGER TOGETHER!

TOROS KADINLARI

KADIN ÜRETİCİLERİ DESTEKLEME DERNEĞİ

DREAMWORLD
Hotels

TOWARDS A STRONGER FUTURE THROUGH SOLIDARITY

At Dream World Hotels, we value contributing to our community and the environment.
With this commitment, we organise school fundraising fairs and help meet the needs of places of worship.

SCHOOL FUNDRAISING FAIRS

We organise fundraising fairs in schools to support students' social development and strengthen the values of helping and sharing.

AIR CONDITIONING DONATED TO A MOSQUE

We donated air conditioning to our local mosque to help provide a more comfortable environment for worshippers.

We create together, share together and grow stronger together.

TOGETHER FOR A BETTER TOMORROW!

WILDLIFE CONSERVATION AND CULTURAL HERITAGE

We undertake initiatives to protect, care for and feed wild and domestic animals in the surrounding area. Keeping seawater clean is one of our highest priorities for both wildlife conservation and sustainable tourism.

We provide sufficient waste bins on the beach, empty them regularly and keep the beach clean. We train our beach staff and monitor beach cleanliness to help maintain cleaner shores.

We display information about the endangered sea daffodils growing along the coast. Our hotel also provides a cat shelter.

To reduce carbon emissions and support access to clean energy, we provide an electric vehicle charging station on our premises.

• Our hotel provides a donation box to support the protection, care and regular feeding of cats living in the surrounding area. Voluntary donations from our guests are used to provide cat food, food and water bowls, and other care essentials.

• Through this initiative, we aim to contribute to animal welfare, raise awareness and involve our guests in this shared responsibility. We consider supporting a safe and healthy living environment for our animal companions an integral part of our approach to sustainability.

Environmental Practices in Our Hotel Gardens

In our hotel gardens:

We minimise the use of chemical pesticides and favour organic alternatives to protect the environment, human health and wildlife.

We use organic fertilisers wherever possible and continue working to reduce chemical fertiliser use. We favour perennial plants over seasonal plants and choose species with low water requirements.

Drought-tolerant plants found on our grounds include:

- *Olive trees*
- *Bougainvillea*
- *Date palms*
- *Palm trees*
- *Cacti*
- *Yucca filamentosa*
- *Silk floss trees – Ceiba speciosa*

We have expanded the use of drip irrigation throughout our grounds.

DREAMWORLD
Hotels

WILDLIFE CONSERVATION
AND CULTURAL HERITAGE

At Dream World, we work in harmony with nature for a sustainable future. By protecting natural resources, we add value to our environment and offer our guests a healthier, more refreshing setting through our green spaces and cultural heritage.

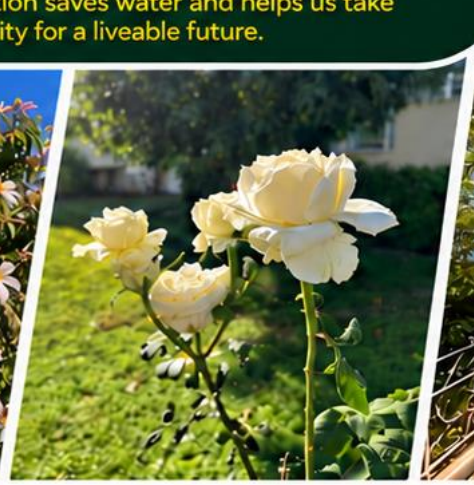
RESPECT FOR NATURE
We protect our plants and natural resources with an environmentally responsible approach.

SUSTAINABILITY
Through water conservation, waste management and recycling, we aim to leave a more liveable world for future generations.

LOCAL PLANT SPECIES
We choose local plant species suited to the region to support the ecosystem and preserve its natural balance.

CAREFUL MAINTENANCE
Our expert team provides regular care to keep our plants healthy and vibrant.

WE USE DRIP IRRIGATION.
We meet our plants' water needs with respect for nature.
Drip irrigation saves water and helps us take responsibility for a liveable future.



PROTECTING NATURE,
Protecting Our Future.

RESPECT FOR NATURE | WE USE DRIP IRRIGATION | RECYCLING | SUSTAINABILITY | FUTURE GENERATIONS

Our green spaces enhance quality of life today and tomorrow.

We choose drip irrigation to use our water resources efficiently. Less water, a greener world!

Monkey Puzzle Tree (*Araucaria araucana*)

The monkey puzzle tree (*Araucaria araucana*) is an exotic species with no recorded natural occurrence in Türkiye. It was introduced and planted outside its native range. It does not reproduce naturally in Türkiye but can be cultivated. Its native range lies in the Andes Mountains of southern Chile and southwestern Argentina. It is the most cold-tolerant species in its genus and is a highly ornamental tree grown in parks and gardens in Türkiye.

Its crown varies from egg-shaped to conical, with loosely arranged branches. After approximately 100 years, it sheds its lower branches, exposing the lower trunk. Older trees retain branches only at the very top, leaving a straight, cylindrical trunk. The trunk's straightness and length have made it desirable for timber. Such logging has reached threatening levels in Chile. Now a rare, Red-listed species, the monkey puzzle tree is prohibited from international commercial trade.

Its dark grey bark protects the tree against damage from lava and volcanic eruptions. It also develops numerous deep-reaching roots.

The tree is densely covered with very stiff, scale-like leaves. The triangular leaves measure 3–4 cm in length and width, are sharp, and end in a pointed brown spine. Their margins have a yellowish tinge, and they are arranged spirally along the branches.

It grows very slowly, rarely exceeding 30 cm of growth per year. These trees can live to a remarkable age, with specimens reported to be 1,300 or even 2,000 years old. However, trees around 500 years old have commonly been harvested for timber.

DREAMWORLD Hotels

SEA DAFFODIL

(Pancratium maritimum)

A Natural Heritage of Mediterranean Coasts Worth Protecting

CHARACTERISTICS

Its flowers are white, showy and highly fragrant. It mainly prefers stable dunes.

The sea daffodil is a sun-loving plant. It prefers dry, stable dunes and open areas with sparse vegetation.

As a geophyte, it remains dormant during winter. In extreme summer heat, it can obtain moisture from the atmosphere or night-time dew.

It can also use groundwater influenced by the sea and therefore has high salt tolerance.

NATURAL LIFE CYCLE

- **Autumn:** Flowering
- **Winter:** Dormancy
- **Spring:** Leaf development
- **Summer:** Seed formation after flowering

An important part of the dune ecosystem.

THREATS IT FACES

- Tourism pressure
- Coastal development
- Destruction of dunes
- Damage to dunes for industrial and other purposes
- Irresponsible visitor activities

WHAT ARE WE DOING?

At Dream World Hill, we support the protection of coastal ecosystems and adopt sustainable environmental management practices that safeguard natural habitats.

Protecting sensitive species such as the sea daffodil is essential to preserving biodiversity for future generations.

PROTECTED SPECIES

- The threatened sea daffodil (*Pancratium maritimum*) belongs to the Amaryllidaceae family and is described as monotypic (with no subspecies).
- In Türkiye, it grows on coastal dunes along the Mediterranean, Aegean, Marmara and Black Seas.
- Picking or damaging it is prohibited.

PLEASE HELP PROTECT THEM!

Our grounds include areas where sea daffodils are grown.

- It grows throughout Mediterranean countries and in parts of the Black Sea coast.
- The species is threatened with extinction!
- Uprooting sea daffodils or taking them out of the country is a criminal offence in Türkiye.

The fine for picking sea daffodils is TRY 387,141.

RESPECT NATURE · SAVE WATER · PROTECT THE FUTURE · AN INFORMED TOMORROW

SUSTAINABILITY AND BIODIVERSITY INITIATIVES

"Let us protect the quiet beauty of our shores.
The sea daffodil is a natural heritage we will pass on to future generations."

WE VALUE WATER

Every Drop for a Greener Future

At Dream World Hill, we recognise the vital role of water in sustaining life and nature. Protecting water is the key to a sustainable future for present and future generations.

WE CONSERVE WATER

We reduce water consumption at our hotel through water-saving systems, regular checks and awareness initiatives.

WE PROTECT NATURAL RESOURCES

We work towards sustainable water resource management, healthy ecosystems and the protection of biodiversity.

WE RAISE AWARENESS AMONG OUR GUESTS AND STAFF

By raising awareness of water conservation, we work together towards a more liveable future.

FOR FUTURE GENERATIONS

Every measure we take today helps us leave a cleaner, greener and more liveable world for tomorrow.

Protecting water means protecting life.

WATER CONSERVATION | ECO-FRIENDLY PRACTICES | SUSTAINABILITY | FUTURE GENERATIONS

Environmental Action

- Please place used syringes in the **sharps container in the doctor's office** and other medical waste in the designated medical waste bin.
- Dispose of used batteries in the **battery collection box at reception**.
- Packaging waste is recyclable. Please sort it by type and place it in the **colour-coded recycling bins in communal areas**.
- When leaving your room, **remove your key card from the power slot** to prevent unnecessary electricity consumption.
- We encourage you to admire the **sea daffodil**, one of our region's natural treasures, in its natural habitat without harming it.
- To help reduce plastic use, please use the **water dispensers on guest floors and in communal areas**.

DREAMWORLD Hotels

ASPENDOS
ANCIENT CITY

Located near the Köprüçay River in Antalya's Serik district, Aspendos takes visitors on a journey through history with its magnificent Roman theatre, aqueducts and ancient ruins.

ROMAN THEATRE
Built in the 2nd century AD by the architect Zeno, the theatre captivates visitors with its well-preserved structure.

AQUEDUCTS
The aqueducts that supplied water to the ancient city are impressive examples of Roman engineering.

TRACES OF THE ANCIENT CITY
The remains of the agora, basilica and monumental fountain shed light on life in the past.

CULTURAL HERITAGE
The Theatre and Aqueducts of Aspendos are on the UNESCO World Heritage Tentative List.

VISITOR EXPERIENCE
Explore the historic setting, take photographs and protect our cultural heritage.

A JOURNEY INTO ANTIQUITY
From the stone steps to the magnificent stage, discover the traces of history at Aspendos.

Recommended visit duration: **1 – 2 hours**

LOCATION AND TRANSPORT

- Dream World Hill → Aspendos Ancient City
- Approximately **30 km**
- Approximately **40 – 45 minutes by car**
- Follow the D400 towards Antalya, then follow the signs for Aspendos / Belkıs.

Distance and travel time may vary depending on route and traffic.

TRACES OF ASPENDOS

ANCIENT THEATRE
A well-preserved Roman theatre, world-renowned for its excellent acoustics.

STAGE BUILDING
An outstanding example of Roman architecture, adorned with statues and decorative details.

AQUEDUCTS
The lofty arches that supplied water to the ancient city are a legacy of Roman engineering.

ANCIENT CITY
The agora, basilica, baths and monumental fountain ruins reflect life in the past.

HISTORICAL DETAILS
Column capitals, reliefs and stonework reveal the finesse of ancient art.

WE PROTECT OUR CULTURAL HERITAGE.
Let us avoid damaging historic structures, follow visitor rules and pass our heritage on to future generations.

PROTECT NATURE
Keep historic sites clean.

SHOW RESPECT
Respect cultural heritage.

RAISE AWARENESS

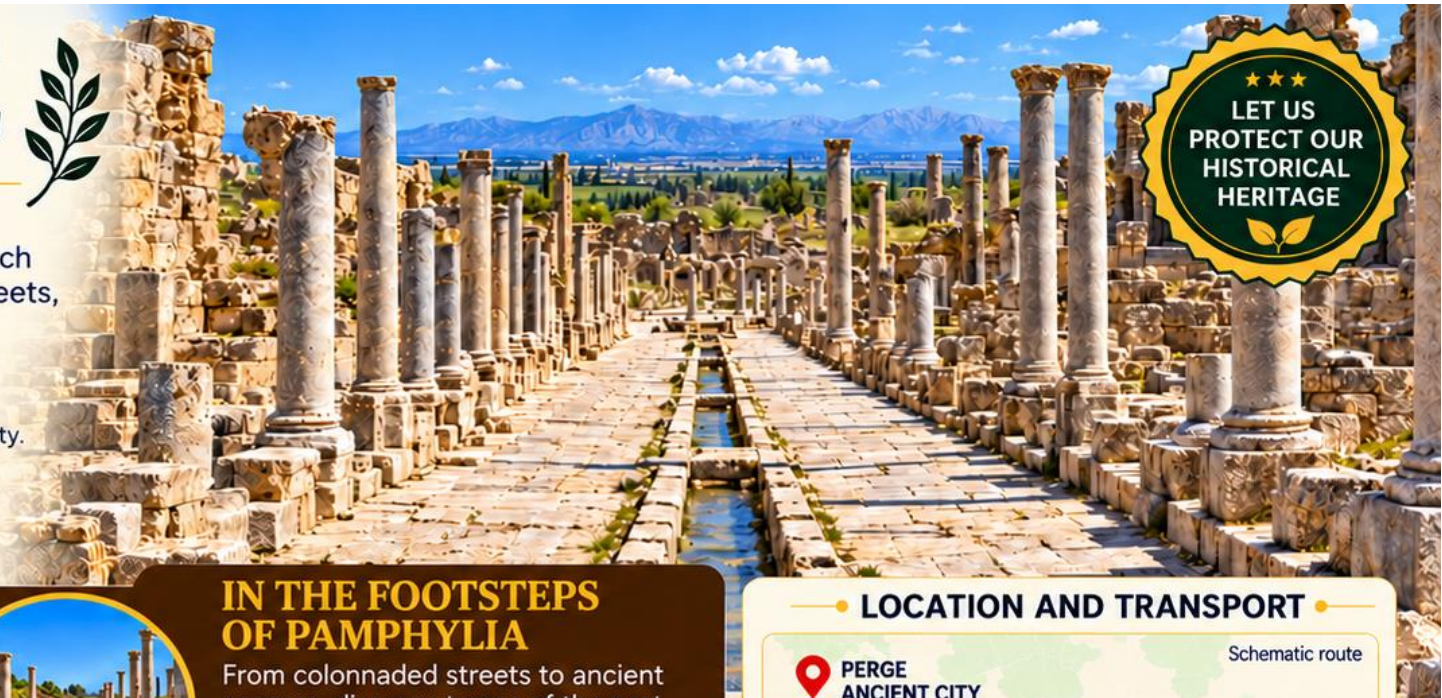
PERGE
ANCIENT CITY



LET US PROTECT OUR HISTORICAL HERITAGE

Located in Antalya's Aksu district, Perge brings the rich history of Pamphylia to life through its colonnaded streets, stadium, baths and monumental buildings.

COLONNADED STREETS
The colonnaded streets, with water channels running down their centres, reflect the splendour of the ancient city.

ANCIENT STADIUM
The well-preserved stadium sheds light on the sporting and social life of the past.

ROMAN BATHS
The bath ruins offer an opportunity to explore Roman architecture and everyday life.

HELLENISTIC GATE
Known for its round towers, this monumental entrance is one of the city's landmarks.

VISITOR EXPERIENCE
Walk along ancient streets, discover historical details and protect our cultural heritage.

IN THE FOOTSTEPS OF PAMPHYLIA
From colonnaded streets to ancient squares, discover traces of the past at Perge.

Recommended visit duration: **2 – 3 hours**

TRACES OF PERGE

COLONNADED STREET
With its central water channel, the colonnaded street is one of Perge's most impressive features.

ANCIENT STADIUM
The well-preserved stadium reflects sporting and social life in antiquity.

HELLENISTIC GATE
The monumental entrance, known for its round towers, is a landmark of the city.

ROMAN BATHS
The bath ruins reveal Roman architecture and the culture of everyday life.

AGORA
The ancient square at the heart of commerce, administration and seryday life.

LOCATION AND TRANSPORT

Dream World Hill → Perge Ancient City

Estimated distance: approximately **60 km**

Estimated driving time: **1 hour – 1 hour 15 minutes**

Follow the D400 towards Antalya. In Aksu, follow the signs for Perge.

Distance and travel time may vary depending on route and traffic.

WE PROTECT OUR CULTURAL HERITAGE.
Let us avoid damaging historic structures, follow visitor rules and pass our heritage on to future generations.

KİLİM WEAVING

Cultural Heritage Woven into Threads

Kilim weaving is a cultural heritage of Anatolia's indigenous folk arts, bringing our cultural legacy to life through its colors, motifs and the care it embodies. The patterns and techniques woven by interlacing warp and weft threads carry the stories of the lands, their traditions and the weavers.

HISTORICAL ROOTS
A traditional weave passed down through generations.

NATURAL MATERIALS
Made from natural fibers such as wool and cotton.

CRAFTSMANSHIP AND PATIENCE
Each piece is created with skill, attention to detail and dedication.

CULTURAL HERITAGE
Reflects the traces of traditional life and carries them into today.

THE LANGUAGE OF MOTIFS
Local motifs carry different stories and meanings.

BRIDGING TO THE FUTURE
Weaving knowledge is shared with new generations.

MATERIALS USED IN KILIM WEAVING

WOOL AND COTTON
Kilims are woven from natural fibers such as wool and cotton.

DYES
Produced from plants, roots and natural sources found

LOOM
A loom is used to interlace the warp threads and weave the kilim.

WEAVING COMB
Beats the weft threads tightly to keep the design in place.

SHUTTLE
Used to pass the weft thread between the warp threads.

SCISSORS
Used to cut threads and trim excess yarn at the end.

THE JOURNEY FROM YARN TO KILIM

1 **YARN PREPARATION**
The appropriate yarns are selected and prepared.

2 **DYEING**
Yarns are dyed in colors suitable for the kilim design.

3 **LOOM PREPARATION**
The warp threads are set up on the loom.

4 **WEAVING**
Colored weft threads are interlaced to create the motifs.

5 **FINISHING**
Edges and fringes are trimmed and neatened.

6 **FROM TRADITION TO THE FUTURE**
Kilims carry our cultural heritage into today's living spaces.

WE PRESERVE OUR CULTURAL HERITAGE
By giving value to handcraft, we pass our traditional arts on to future generations.

WE PROTECT
We safeguard our traditional arts and local motifs.

WE SHOW RESPECT
We value the efforts of our craftspeople and their cultural heritage.

WE RAISE AWARENESS
We share knowledge about our traditional arts with the public.

WE BRIDGE TO THE FUTURE
We continue to pass on kilim weaving to new generations.

THE ART OF ÇİNİ

TRADITIONAL TURKISH TILEMAKING

Rooted in the rich heritage of Anatolia, the art of çini is one of the most refined and original art branches of Turkish-Islamic civilization. Especially during the Seljuk and Ottoman periods, İznik çini gained worldwide fame and was used in mosques, palaces, tombs and mansions. Today, it holds a distinguished place in our cultural heritage as one of the most valuable examples of our art.

HISTORICAL ROOTS
An art form that dates back to the Seljuk and Ottoman periods.

NATURAL MATERIALS
Produced from clay, water and natural mineral pigments.

CRAFTSMANSHIP AND PATIENCE
Each tile is carefully shaped and decorated with unique patterns.

CULTURAL HERITAGE
Used in mosques, palaces, tombs and mansions, it has added colour to our architectural heritage.

INSPIRED BY NATURE
Motifs such as tulip, clove, hyacinth, vine and leaf are stylized with inspiration from nature.

A BRIDGE TO THE FUTURE
The art of çini, which carries traditional craftsmanship to future generations, is an invaluable cultural value that must be preserved.

MATERIALS OF TRADITIONAL TURKISH TILEMAKING

TILE CLAY
Special clay used in the production of çini tiles.

WATER
Used to prepare and shape the clay into a workable paste.

NATURAL PIGMENTS
Colours obtained from natural minerals.

BRUSHES AND TOOLS
Special brushes designed for applying the patterns.

UNGLAZED TILE
Çini tiles before being painted with patterns.

KILN
The patterns are fired at high temperatures to become permanent.

THE STEPS OF TURKISH TILEMAKING

1

SHAPING
Special clay is prepared and shaped into tiles and other forms.

2

DRAWING THE DESIGN
Motifs inspired by nature and traditional patterns are drawn onto the tile.

3

PAINTING
The drawn motifs are carefully coloured with natural mineral pigments.

4

FIRING
The tiles are fired at high temperatures to achieve durable and glossy colours.

5

THE FINISHED WORK
A timeless, aesthetic and culturally significant work of art emerges.

6

FROM TRADITION TO THE FUTURE
Continuing from past to present, the art of çini carries our cultural heritage to future generations.

WE OWN A NATURAL AND CULTURAL HERITAGE
We protect the historical values of the past and pass them on to future generations. Leaving a more livable world for the next generations is our greatest heritage.

PROTECT
We preserve our natural and historical values.

SHOW RESPECT
We recognize the value of our cultural heritage and show respect for it.

RAISE AWARENESS
We inform our visitors and increase awareness.

PASS IT ON TO THE FUTURE
We carry our cultural heritage to future generations.

HİBEŞ

A Local Flavour of Antalya

HİBEŞ is a beloved meze of Antalya cuisine, prepared by bringing together tahini, lemon juice, garlic, cumin and ground red pepper. With its thick texture and distinctive aroma, it adds a unique local touch to tables and offers a traditional taste.

LOCAL CUISINE
An integral part of Antalya's culinary culture, reflecting traditional meze recipes.

AUTHENTIC TASTE
Tahini, obtained from sesame seeds, is the main ingredient of HİBEŞ.

FLAVOURFUL AROMA
Cumin, garlic and ground red pepper create its distinctive flavour.

SHARED AT THE TABLE
It can be served as a meze or appetizer with bread or crackers.

KEY INGREDIENTS OF HİBEŞ

Tahini | Lemon juice | Garlic | Cumin and ground red pepper

Contains sesame.

COMPONENTS OF THIS TRADITIONAL FLAVOUR

TAHİNİ
The source of HİBEŞ's thick texture and sesame aroma.

LEMON
Adds a refreshing and vibrant flavour to the dish.

GARLIC
Completes its distinctive aroma.

SPICES
Enriched with cumin and ground red pepper.

HİBEŞ SERVING
Served with bread or crackers as a meze at the table.

WE PROTECT NATURE
We preserve our natural resources and pass them on to future generations.

WE SUPPORT LOCAL PRODUCTION
We support the efforts of our local producers and contribute to the local economy.

WE KEEP OUR CULINARY CULTURE ALIVE
We protect and promote our traditional recipes, enriching our culinary culture.

A TASTE FOR THE FUTURE
By sustaining this unique flavour, we aim to pass it on to future generations in the same way.

PUMPKIN DESSERT

A Traditional Flavour

Pumpkin Dessert, prepared from pumpkins grown in the fertile lands of our region, is one of the most special treats of our traditional cuisine with its natural ingredients, lightness and unique flavour.

LOCAL AND NATURAL
Prepared naturally with locally grown pumpkins from our region.

DEVELOPS FLAVOUR
The pumpkin absorbs the syrup and develops its distinctive flavour.

HEALTHY AND LIGHT
Rich in natural fibre and vitamins, it is a light and nutritious dessert option.

SUPPORTS LOCAL PRODUCERS
By using local ingredients, it contributes to the region's economy.

NATURAL INGREDIENTS

PUMPKIN

SUGAR

TAHINI

WALNUTS

CINNAMON (optional)

STEPS TO PREPARE PUMPKIN DESSERT

1 **PREPARE THE PUMPKIN**
Peel ripe and sweet pumpkins and cut them into suitable pieces.

2 **ADD SUGAR**
Sprinkle natural granulated sugar over the pumpkin pieces and let them rest to release their juice.

3 **CREATE THE FLAVOUR**
Slowly cook the pumpkin in its own juice until it becomes tender and absorbs the syrup.

4 **SERVE**
Place the tender pumpkin pieces on a plate and top with tahini and walnuts if desired.

PROPERTIES OF PUMPKIN DESSERT

No additives are used.

No preservatives are used.

Natural sugar is used.

Rich in fibre and vitamins.

PROTECTS NATURE
We protect our natural resources and pass them on to future generations.

SUPPORTS LOCAL PRODUCTION
By working with our local producers, we contribute to regional economic growth.

PRESERVES OUR CULTURAL HERITAGE
We keep our traditional flavours alive and pass on our cultural heritage.

A TASTE FOR THE FUTURE
With sustainable tourism, we aim to pass this unique flavour to future generations.

ALANYA GÜLÜKLÜ SOUP

A Taste of Traditional Gatherings

Gülüklü soup is a delicious traditional soup from Alanya cuisine, made with tiny meatballs, chickpeas, rice and tripe or chicken. It is a hearty soup prepared with tomato paste and spices, and is named after the miniature meatballs called "gülük" or "hülük".

LOCAL CUISINE
It reflects the rich culinary culture of Alanya.

MINI MEATBALLS
The tiny meatballs called gülük give the soup its distinctive character.

RICH INGREDIENTS
Chickpeas, rice and meat come together in a nutritious and flavourful soup.

A SHARING TRADITION
It is a special soup served during weddings and special occasions, reflecting our local culture.

BASIC INGREDIENTS OF THE SOUP

Small meatballs

Chickpeas

Rice

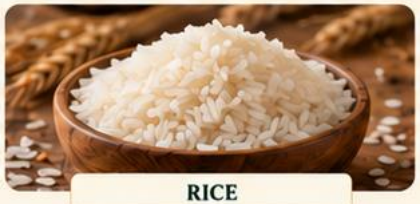
Tripe or chicken

Flavoured with tomato paste and spices.

COMONMENTS OF THIS TRADITIONAL FLAVOUR

GÜLÜK MEATBALLS
The miniature meatballs that give the soup its name.

CHICKPEAS
A fundamental ingredient in the traditional recipe.



RICE
Completes the texture of the soup.

CHICKEN MEAT
Prepared with tripe or chicken meat.

GÜLÜKLÜ SOUP
A hot, freshly served dish with an authentic taste.

PROTECT NATURE
We protect our natural resources and pass them on to future generations.

SUPPORT LOCAL PRODUCTION
We contribute to the regional economy by valuing our local producers.

KEEP OUR CULINARY CULTURE ALIVE
We keep our rich culinary culture alive by passing down our traditional recipes from generation to generation.

LEAVE A BETTER TOMORROW
We aim to pass on this unique flavour of our geography to future generations in a sustainable way.
